

APVIC commenced on 18th April, 2009, at Indraprastha Apollo Hospital and ETHICON Institute of Surgical Education, New Delhi. It was inaugurated by one of the most eminent, dynamic and senior most cardiologist of our country Dr. S. Padmavati.

## Asia Pacific Vascular Society

APVIC entered its second year on 3rd - 5th April 2010, at the Indraprastha Apollo Hospital, New Delhi. It was inaugurated by the world renowned Endovascular Interventionalist Dr. Michel Henry from France. APVIC collaborated with Cardiological Society of India (CSI), Indian College of Cardiology (ICC) and Endovascular Interventional Society of India.

APVIC - III (11 - 13th March, 2011) opened new horizon for cardiovascular health professionals by collaborating with ISES & SCAI (USA). The mission of APVIC came alive by introducing the Fellows Course in association with ISES and SCAI. APVIC included live cases, Workshops on vascular imaging, vascular access closure devices, endovascular aortic repairs (EVAR, TEVAR), below knee intervention and dialysis access interventions.

8-10 June, 2012: 1st APVS Summit on Aortic Interventions (ASAI) was introduced, dedicated to Aortic Dissection, Aneurysms, Hybrid Procedure, Branch and Fenestrated Graft, Chimney Grafts, Percutaneous Aortic Valve Implantation. **APVS - LEGS FOR LIFE PROGRAMME** and **APVIC ON THE ROAD PROGRAMME** (on-site training in different cities of India) added a new dimension to APVIC - IV. Inaugurated by Dr. Edward Diethrich, Founder Chairman, ISES (USA).

**APVS Office:**  
L-117, Sarita Vihar,  
New Delhi - 110 076  
Ph.: 011-41012702

### Conference Secretariat:

Dr (Prof.) N N Khanna  
Sr. Consultant, Interventional Cardiology and Vascular Interventions  
Advisor - Apollo Group of Hospitals  
Room No. 1802, Indraprastha Apollo Hospitals, New Delhi  
Ph. No.: 011-29871899, +91 9810494072, +91 8447310885  
E-mail: nnkhannaapvic@gmail.com  
Website: www.drnnkhanna.com; www.apvs.in

Dr Michel Henry (France)  
Chairman

Dr N N Khanna (India)  
Chairman

**DR (PROF.) N N KHANNA**  
MD, DM, MNAMS, FACC (USA), FSCAI (USA),  
FCCP (USA), FESC, FAPSIC, FIMSA,  
FEISI, FICC, FIAMS

14 - 16th June, 2013: The highlight of the conference was **APVS-CORDIS - IRONMAN** competition. It included the most challenging and unusual cases with out of the box thinking. For the first time, free membership of ISES, was awarded to the three winners of APVS - Iron Man. Inaugurated by Dr. Donald Reid, President of International Society of Endovascular Specialists (USA).

## Asia Pacific Vascular Society:

- Formed in 2009
- Society of Vascular Interventionalists, Cardiologists, Vascular and Cardiothoracic Surgeons, Vascular Physicians, Interventional Radiologists.
- Collaborations with International & National Societies
  - International Society of Endovascular Specialists, USA
  - Society for Cardiac Angiography and Interventions, USA
  - Moroccan Society of Endovascular Specialists
  - Vascular Society of India
  - Indian College of Cardiology
  - Cardiological Society of India
  - Endovascular Intervention Society of India
  - Association of Vascular Access and Interventional Renal Physicians (AVATAR)

## Chairman's Message . . .

*The concept of Asia Pacific Vascular Society (APVS) was conceived over a discussion one evening at Washington DC, USA, when some of the doyens of interventional cardiology and vascular surgeons thought of forming a society*

*of vascular interventionalists, surgeons, physicians and other healthcare professionals with special interest in vascular disorders.*

*APVS conducted the first meeting in the year 2009 at New Delhi. Since then, the society has been steadily advancing in its main objectives – research and education in the field of vascular diseases, to provide a forum for clinicians and scientists to regularly meet and share their experiences and collaborate to increase awareness and understanding of complete spectrum of interventional therapies.*

*One of the main activities of the societies has been organization of the Asia Pacific Vascular Intervention Courses (APVIC I-V). APVIC is the most rapidly growing Vascular Intervention Course in the Asia Pacific region and encompasses didactic lectures, live case transmissions, hands on workshop, case based discussions on topics of Peripheral Vascular Interventions.*

*It is a multidisciplinary educational course covering basics and advanced techniques of peripheral vascular interventions, basic concepts of vascular biology, new techniques like Endo Lasers, Stem Cell Therapy, EVAR, TEVAR, CDTT, Internal Pudendal Artery Stenting for male erectile dysfunction, Interventions for Acute Stroke and Percutaneous Treatment of Structural Heart Disease.*

*Over the years, the APVS has collaborated with many national and international societies – viz. International Society of Endovascular Specialists (USA), The Society for Cardiovascular Angiography and Interventions (USA), Indian College of Cardiology (India), Cardiological Society of India (India), Vascular Society of India (India), Endovascular Interventional Society of India (India), Moroccan Society Endovascular Specialist (Morocco).*

*It runs a very successful Fellows Course in association with ISES and SCAI, USA. This course is an internationally popular and sought after course.*

*APVIC intends to be a truly collaborative cross-speciality training event for the “Interventionalists of the future”.*

*Membership of Asia Pacific Vascular Society, is open to Interventional Cardiologists, Vascular Surgeons, Interventional Radiologists, Endocrinologists and Vascular Physicians. We invite you to join as members of this society and be partners in the vision of Asia Pacific Vascular Society. The details of APVS are available on our website: [www.apvs.in](http://www.apvs.in)*

## Asia Pacific Vascular Intervention Course

### - Aims & Objectives:

- Learning experience for participants and platform for exchange of knowledge between key opinion leaders of the world.
- To increase awareness and understanding of the complete spectrum of interventional therapies.

### - Conference Format:

- Three day meeting - Focus on medical therapy, interventional devices and techniques, case selection and complications.
- Didactic Lectures & Live Case Transmissions from various sites in Asia Pacific region
- Live Case Demonstrations by various National and International Experts
- Hands-on Workshops
- Case Based discussions with invited International Faculty
- Multidisciplinary, Educational Course covering Basics and Advanced techniques of Peripheral Vascular Interventions, basic concepts of vascular biology, New Techniques like: Endo Lasers, Stem Cell Therapy, EVAR, TEVAR, CDTT, Internal Pudendal Artery stenting for male erectile dysfunction, Interventions for Acute Stroke.

### - Target Audience:

- Vascular Interventionalists, Physicians, Cardiologists, Interventional Radiologists, Vascular and Cardiothoracic Surgeons, Neuroradiologists and Neurosurgeons, Nurses and Technicians.
